

## Product Data Sheet – SGS Gambling Questionnaire

**The Safe Gaming System™ (SGS) is a complete “safety net” service designed for individuals who choose to gamble and for gaming operators who wish to offer their patrons SGS features. SGS both protects registrants from developing problems and provides analysis of actual gambling behavior.**

SGS provides individual “service modules”, which incorporate the various features of the system. This allows subscribing organizations to provide custom, effective, system features that are essential to assist patrons or site visitors to avoid the issues of excessive or inappropriate gambling.

The social mission is to reduce and/or eliminate the harm to people caused by gambling issues and to offer gaming operators a helpful tool to assist their patrons to gamble responsibly.

One service module is the **SGS Self-administered Gambling Questionnaire**. This product may stand alone to provide a Web-based assessment of an individual’s current gambling behavior and personal potential risk of developing gambling issues, using a simple, online tool.

The questionnaire is accessed from a direct link provided by the sponsoring gaming operator from a Website or any Internet-connected location or device, such as a kiosk or personal computer.

All SGS service modules have been professionally designed and tested by experts in the field of responsible gambling. A great number of participants over several years have utilized the SGS gambling questionnaire content.

**Key specifications and features of the SGS Self-administered Gambling Questionnaire are:**

- \* **An introductory page** identifies and recognizes the organization or entity sponsoring the link. Clear instructions are provided for completing the questionnaire and utilizing the results.
- \* Approximately **30 questions are presented**, which determine the participant’s gambling sub-type and survey personal characteristics to assess the personal risk for developing gambling problems.
- \* **The latest and most reliable testing content is utilized.** SGS has selected the highest quality research results from worldwide resources to ensure the most accurate possible results.
- \* **Questions are clear, unambiguous statements.** The answers from choices presented are selected by radio button, minimizing the time to obtain results.
- \* **The completed questionnaire** is analyzed and secure, private results are presented immediately via the SGS analysis and scoring software.
- \* **A definition of gambling sub-types** and correlates (a.k.a. risk factors) are provided with the results.
- \* **Guidance is provided** to assist the participant to properly interpret results.
- \* **Suggested “next steps” are provided.** Links or resources are offered to allow the participant to progress logically to the next step, if further action is appropriate.
- \* **Optionally, the user may remain completely anonymous or securely store test results for future reference.**
