

## About The Safe Gaming System™

**The Safe Gaming System™ (SGS) is a complete “safety net” service designed for individuals who choose to gamble and for gaming operators who wish to serve patrons who subscribe to SGS. It both protects registrants from developing problems and provides analysis of actual gambling behavior.**

**SGS recognizes that gambling is a very popular recreational activity that millions of people enjoy, and it provides effective, reasonable controls that are essential to avoid the issues of excessive gambling.**

SGS is a patented system, which provides comprehensive, universal, individualized gambling controls for its registrants, and many significant advantages for gaming operators. SGS' technology, in its fully implemented state, serves to reduce and prevent the development of gambling issues (i.e. “problem gambling”) in all legal gaming venues where it is deployed.

SGS safeguards its registrants from developing problem gambling issues by requiring "pre-commitment" to their maximum gaming entertainment expenditures. The agreement between SGS and its registrants is intended to ensure that gambling expenditures do not exceed a level that is affordable, without causing harm, to the individual. SGS process includes a means to jointly establish an appropriate gaming budget. Debits are allowed only up to the pre-committed budget, and no more.

The social mission is to reduce and/or eliminate the harm to people caused by inappropriate gambling and to elevate the perception by patrons and regulators of gaming operators who adopt SGS.

The SGS is software-oriented so that it can be configured to work with a wide variety of gaming operators' hardware and software systems.

**Among other features, the key services provided by SGS are:**

- \* A personal, secure initial **self-assessment** of each SGS registrant for susceptibility to gambling problems.
- \* **Ongoing screening for problem gambling behavior** and providing referrals and guidance for assistance.
- \* Guidance, initiation, and control of **personal gaming parameters** (including time and loss limits) employed in SGS.
- \* **Pre-commitment to maximum gaming expenditures** based upon affordability.
- \* **“Cashless”** gaming transactions, where supported by venue technology.
- \* **Enforcement of limits** during gambling sessions at legal venues.
- \* **Debiting/crediting of SGS debit card account** for cashless gaming activities.
- \* **Interchangeability** of SGS debit card with SGS venues' “players' cards.”
- \* Ability to **register** SGS venues' **“players' cards”** for the venues.
- \* **Real-time monitoring** during gambling, with user communication only as needed.
- \* On line educational programs and gaming **tutorials**.
- \* **Reports of gaming activities/behavior** and SGS recommendations.
- \* **Referral service for professional assistance**, as needed, at SGS-affiliated Resource Centers.
- \* Automated self /or/ legislated **venue exclusion management**.
